Independent fresh local range sensing bridges V2V loss
Short simulated studies; native setup and dynamics differ; no string-stability or physical-safety claim
Held-out Python: all declared cells
Mean follower spacing RMS (m)
V2V only
Range ACC
Range + V2V
nominal
leader brake
v2v blackout
radar blackout
dual blackout
loss jitter
ego blackout
cut in
Fixed example: seed 5101, 12 m/s
Follower-1 spacing error (m)
V2V blackout
Simulation time (s)
Native Webots: measured separately
Native follower spacing RMS (m)
